

Universal Snow Fluid

This pro-grade universal snow fluid is perfect for replicating snowflake effects and can be used in most branded snow machines.

SAFETY

This product is manufactured using high grade chemical components which are diluted with water that has been purified using reverse osmosis filtration and ultra-violet sterilisation processes. These processes ensure a very high quality product with virtually no bacteria or mineral content. In certain circumstances smoke, fog and haze effects may cause temporary discomfort to persons suffering from respiratory or allergic conditions. Do not dilute contents.

USE IN WELL VENTILATED AREAS.

Full material safety data is available, upon request, from the manufacturer.

WARNINGS

Not for human consumption. Keep out of reach of children. In the event of fluid coming into contact with clothing or upholstery – wash thoroughly with water. May stain some fabrics. Residue may make surfaces and floors slippery. Be careful in these areas to avoid slipping. Check these areas regularly and clean immediately to avoid potential injury. Store in a cool, dry place. Avoid direct sunlight. Do not store below 10°C.

SAFETY PHRASES

- S24 Avoid eye and skin contact
- S26 In case of contact with eyes, rinse immediately with plenty of clean water and seek medical advice if irritation persists
- S28a After contact with skin, wash immediately with plenty of clean water
